About Us

Radiant AgriTech Limited is India's First scientific eco-farming company to join hands in conserving one of the world's most oldest plant species, by foraying into the potential of US\$3.6Billion in the Indian AgroForestry commercial. With the vision to help over a 1,00,000 middle-segment people to achieve financial freedom in Agriculture and Forestry establishment by safer small scale investments.

What do we do?

1) Radiant & AgroForestry

Radiant is regenerating one of the demanded & endangered forest species, 'Pterocarpus santalinus' in South India and has established the largest Red Sanders plantation as an AgroForestry concept in the world.

2) India's Status in GreenList

India contributes over 18% of the world's population, but sadly 1% in afforestation with 630 sq.km of forest cover area. @RadiantAgriTech we wish to accelerate the volume by 5% + by 2024.

3) Project Regulated by

The Ministry of Environment, Forests and Climate Change India, International Union for Conservation of Nature - Switzerland, The Rainforest Alliance - NY, USA.

World's ,

- 1st to implement Nano-Tech in Agro-Forestry
- 1st large-scale organic afforestation farm
- 1st to convert 3000 hectares into bushy forests
- 1st wide step to conserve India's most valuable tree species.
- 1st company to invite civilians to take part in the conservation process thru preferential issues.
- 1st company to 'e-Register' its yield offerings thru Governmental Agencies like SHCIL & NSDL.

Space and Returns

1) Farming Space

With over 3000+ hectares of own farming lands in and around South Indian states Tamilnadu, Karnataka & AP, the company intends to seed 9000+ trees in the 1st year of its inception.

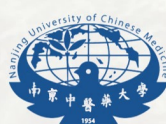

2) Yield Out Volume

@RadiantAgriTech we forecast a gross yield out volume of 2.7 Million tonnes of red-sanders in the year 2033 with 0.83% contribution to India's GDP.

3) Commodity Sales / Auction

@RadiantAgriTech we assure to sell off the yield to back to governmental organizations or authorized institutions to generate and distribute ROI among its yield shareholders, thru MSTC Limited.

Red sanders find very little use in India

Hyderabad: Red sanders has a wide variety of uses, from carving beautiful traditional musical instruments and grandiose furniture used as status symbols out of the tree's heartwood, to using it for preparation of traditional medicines and edible dyes.

However, all these uses of red sanders are found mainly in China and Japan. According to sources, South Korea is said to be an emerging market. When it comes to India, red sanders find very little use, mostly as medicines in ayurveda and sidha systems.

An AP forest department official said, "Red sanders smuggled out of the country to Japan has been in use for making musical instruments like Shamisen, Koto and Erhu over many years.

Now China has overtaken Japan as the largest user of red sanders. The Chinese associate red sanders furniture with royalty. A single chair made of red sanders costs as much as Rs 10 lakh. Also, the furniture does not use any other material like adhesives." "The Chinese are very good in differentiating between red sanders grown in natural forests and that grown on patta land. So, the demand will always remain high for red sanders from Seshachalam even if the trees are grown on patta lands for commercial purposes," he said.

Grow Red Sanders to become Billionaires: AP Forest Forces Chief Rizvi

TNN | Jul 15, 2018, 02:30 PM IST

GUNTUR: In what could be an interesting appeal, state forest forces chief Md Iyas Rizvi has called upon the people to grow precious plants like red sanders, sandal wood and teak in the barren and waste lands to reap rich in the future.

Scotching the apprehensions about growing red sanders in private land, Rizvi said that absolutely there is no ban on cultivation of any kind of wood. In an exclusive interview with TOI Principal Chief Conservator of Forests (PCCF) Rizvi said that forest department is ready to supply any plant if people came forward to grow them in their backyard. "People are required to take permission to sell the red-sander or sandal wood grown in private land which we will give if they produce proper documents of cultivation. It is no big issue," he promised. He said that there is no need for anyone to seek permission for growing the plants including red sanders.

Rizvi said that people would always prefer gifting gold and land to their children and grandchildren thinking that such things would help their kin in need in future and make them economically stable. "What they actually do not know is that their investment in such things did not make their kin really rich because of the inflation. A gift of one acre of red sander will make their kin a true billionaire," said Rizvi. He said that it would take at least 25 years for the red sander plant to get ready for the sale in the market and at least 100 plants could be grown in an acre of land. "A crop in one acre will be easily worth Rs.50- Rs.100 crore after 25 years depending on its quality," he claimed. He had also said that it would be fully legal and no bar on growing such plants.

He said that there were apprehensions about growing red sanders due to their constant efforts to rein in the red sander smugglers in Seshachalam forests of Kadapa, Chittoor and Nellore districts. He said that they have constituted special taskforce and making relentless efforts to protect the plants because it is in the reserve forest area which the property of the government.

35MT ON BLOCK BY MONTH-END

RED SANDERS IS HEAVIER, DENSER

> A protected species, red sanders is a rare type of sandalwood. Its export has been banned

> Compared to other woods, red sanders is heavier and denser

> It has a pleasing colour and high lustre, and hence, it is used to make ornamental carvings, furniture and musical instruments

> It is in demand in China where 1gm of Pterosibillin, an extract of red

sanders, is used to prepare an alternative for Viagra

> The timber is used to prepare musical instruments in Japan like the Shamosin

> For every 40ft container of red sanders, a smuggler earns ₹2cr profit

Demand high in int'l market
